EXHIBIT A

For purposes of this Agreement, “2010 ADAAG standards” refers to the ADA Accessibility Guidelines 28 C.F.R. Pt. 36, App. A.

The following modifications are to be made by Defendant BELTLINE HOLDINGS, LTD.:

- (i) One accessible route compliant with section 403 of the 2010 ADAAG Standards shall be provided within the Property from the public sidewalk or street to the accessible entrances of the Property in compliance with section 206.2 of the 2010 ADAAG Standards.
 - If this access route crosses a vehicular way, a marked access route shall be placed onto the surface of the vehicular way and the distance of this marked accessible route should be the smallest possible technically feasible distance available.
 - If the cost of providing an accessible route from the public sidewalk exceeds \$4,000.00 or is not technically feasible, after providing Plaintiff's counsel with notice of such cost or infeasibility, it shall be declared not readily achievable to provide an access route leading from the public sidewalk to the accessible entrances of the Property.
- (ii) All accessible parking spaces with ramps in the access aisle or accessible parking space shall be modified in the following manner:
 - Option 1: Remove the existing ramp and provide a curb-cut ramp compliant with section 405 or 406 of the 2010 ADAAG standards. The landing of the new ramp shall be aligned and on the shortest possible distance from the end of the access aisle of the accessible parking space.
 - Option 2: Keep the existing ramp in place. If the existing ramp does not fully comply with section 405 or 406 of the 2010 ADAAG standards, modify the existing ramp so it is in full compliance with either section 405 or 406 of the 2010 ADAAG Standards. Restripe the accessible parking space and access aisle so the access aisle is adjacent to the ramp and the ramp does not protrude into the access aisle or accessible parking space. The new accessible parking space(s) shall fully comply with section 502 of the 2010 ADAAG Standards.
- (iii) All ramps providing an accessible route shall comply with either section 405 or 406 of the 2010 ADAAG Standards. However, if it is not technically feasible to provide a maximum surface slope for the ramp of 1:12, after providing Plaintiff's counsel with notice of such infeasibility, as a readily achievable alternative, the maximum surface slope of that particular ramp shall be permitted to be 1:10.
- (iv) In compliance with section 502.7 of the 2010 ADAAG Standards, parking spaces shall be designed so vehicles when parked, do not obstruct the required clear width of adjacent access routes. Parking stops shall be installed and/or configured so that when vehicles park in a parking space the “nose” of the vehicle does not protrude into the exterior access route decreasing the clear width of the exterior access route to less than thirty-six (36) inches.
- (v) All accessible parking spaces shall fully comply with section 502 of the 2010

ADAAG standards.

- (vi) It is agreed it is not readily achievable to modify the surface slope of the access route so it does not exceed 1:20. As a readily achievable alternative, the surface slope of the access route may be allowed to exceed 1:20, however, if the total vertical rise from the beginning of the sloped surface to the end of the sloped surface exceeds six inches, hand rails in compliance with section 505 of the 2010 ADAAG Standards shall be installed for the entire length of the particular sloped surface.
